

# Mozambique Jobs Expertini®

## Analyst, Disaster Risk and Vulnerability

[Apply Now](#)

Company: International Federation of Red Cross and Red Crescent Societies

Location: Mozambique

Category: other-general

### Job Purpose

To provide a timely and reliable service to the IFRC Africa office through the development and maintenance of an effective risk information, analysis and alerting system for the IFRC Regional Office and Delegations. Specifically, the Risk & Vulnerability Analyst is accountable for the further development and maintenance of IFRC's risk assessment and action planning, development of systems and tools which promote risk-informed action and managing partnerships with academic and technical partners to enhance digital risk analysis capacities.

The R&V Analyst will also support the development of climate models and supporting the development of climate models and triggers for early warning and early action. The R&V analyst will support vulnerability capacity assessments at community level, to better tailor actions as per the existing vulnerabilities and coping capacities.

### Job Duties and Responsibilities

#### **Expand IFRC's risk assessment and action planning, through :**

Set-up a system to identify and analyse risks with the Africa Region (seasonal and imminent)

Strengthening the connection between community-, national- and global risk data/analysis EVCA, national FbF (Forecast-based Financing) mapping and global INFORM WARNING) through enhancement of systems and risk data

Supporting the training and roll out of eVCA tools across the region

Integration of risk analysis, early warning and forecasting into National Society capacity strengthening initiatives, in particular Preparedness for Effective Response (PER) and DREF/Forecast based Action (FbA).

Support the development of Climate models and triggers for early warning and early action

review of Forecast-based Action EAPs, advising specifically around the use of risk data;

Contribute to and advise the learning and feedback process for Forecast-based Action plans and implementation;

Support the R&V team in effectively managing risk information generated through IFRC activities: Forecast based Action, Flood Resilience, Enhanced Vulnerability and Capacity Assessment, RoadMap to Community Resilience, etc.

### **Enhance the inclusion of risk and early warning capacities on the GO Platform:**

Support the development of the GO (phase 4) module for risk and early warning;

Support the implementation of a system for collating and presenting existing hazard, exposure, vulnerability and capacity information (including simple mapping) based on Enhanced Vulnerability and Capacity Assessments, resilience measurements and other risk indices and relevant products/documents;

Regularly maintain and update risk-related data sets for the country and region

Maintain the implementation of the historic crisis databank, to include relevant data on seasonal risks, such as meteorological hazards, political events, historical crisis trends etc;

### **Development and maintenance of academic partnerships to enhance IFRC risk analysis capacities :**

Work with academic partners to develop research themes and projects to address humanitarian challenges;

Engage with the Africa Union Continental Risk Watch, to cross-share risks, streamline systems and extend support

### **Collaboration with D&C colleagues:**

Work in close collaboration with the Information Management Team in Geneva on the

overall workflow and use of risk data through GO platform and related analytical frameworks created by the IFRC;

Work in close collaboration with R&V team in Geneva, in particular the two Resilience Coordinators, the FbF Senior Officer, Flood Resilience Senior Officer and Climate Change Coordinator.

### **Education**

Relevant post-graduate university degree in Disaster Risk Management or equivalent qualification. **Required**

Basic Delegates Training Course (BTC), WORC, IMPACT or equivalent knowledge. **Required**

### **Experience**

At least 5 years of international experience in humanitarian sector technical level related to Disaster Risk Management programming, institutional preparedness capacity strengthening initiatives, emergency response operations or EWEA systems. **Required**

Experience in developing emergency response plans, DREF applications or anticipatory action plans. **Preferred**

Experience working with Red Cross and Red Crescent National Societies. **Preferred**

Experience working for a humanitarian or development organization in the Africa region.

**Preferred**

Good understanding of the IFRC policies, system, and procedures. **Required**

Experience in coordinating with multiple stakeholders, including authorities and other humanitarian actors. **Required**

Experience managing projects including programmatic and financial aspects. **Required**

### **Knowledge, Skills and Languages**

Excellent communication and facilitation skills. **Required**

Well-organized, with very good planning and time management skills. **Required**

Self-supporting in computers (MS Office, , spread sheets, word-processing, data analytics,

presentations, etc.). **Required**

Fluent spoken and written English. **Required**

Good command of another IFRC official language (French). **Preferred**

### **Competencies, Values and Comments**

**Values** : Respect for diversity; Integrity; Professionalism; Accountability.

**Core competencies** : Communication; Collaboration and teamwork; Judgement and decision making; National society and customer relations; Creativity and innovation; Building trust.

**Functional competencies** : Strategic orientation; Building alliances; Leadership; Empowering others.
