NPO/ SSA consultant data manager WHO Health Emergency WHO Mozambique

Grade: NOB

Purpose

The purpose of the post is to provide technical support to the WHO Country Office, WHO polio Emergency and to Ministry of Health and provincial level on data management that will assist for regular decision making and action.

Objective

To provide technical support to enhance early warning/disease Surveillance for timely detection and response to on-going emergencies (IDSR diseases, natural disasters (flooding, cyclone, malnutrition and other disasters) on regular data collection, analysis, interpretation, sharing and mapping of health partners.

Descriptions of duties

Under the supervision of the WHO Representative (WR) and the direct supervision of the WHE cluster in Mozambique, the consultant will have overall responsibility of supporting the data analysis and mapping on planning, implementation, monitoring and reporting of IDSR diseases/conditions and emergencies in the country. He/She will be the focal point of WHO's Health Emergency support to the country.

He/She will:

Facilitate and support the collection, compilation and analysis of data sets for polio and IDSR in the country,

Monitor the data quality including cleaning, validation, verification, standardization and keep records on the timeliness and completeness of data collection

Make sure the system generate data and information and shared to I and WHO Country office,

Prepare a consolidated daily and weekly report to the GPE, WHO Country office;

Prepare a presentation on findings of report, analysis, maps and graphs for regular briefing of surveillance and emergency data to Health Cluster and other coordination meetings;

Support capacity building on training and upgrading the skills of nationals including provincial and district surveillance focal persons,

Participate in the weekly epidemiological bulletin production, conference call and share updates on polio and IDSR activities in the country,

Support the GPEI and WHO country office to do analysis and mapping of spatial health data relevant to health security and emergencies preparedness and response,

Support efforts aimed at building the capacity of WHO country office staff in areas of data analysis and interpretation, application of geospatial and mobile technologies, and mapping,

Participate and assist in the design and analysis of surveys and best practices at country level,

Conduct any other tasks/assignment authorized by polio group and WR.
