

## Marine and Offshore Surveyor

[Apply Now](#)

Company: Lloyd's Register

Location: Maputo

Category: other-general

### What we're looking for

The role of this position is to evaluate the design, production, and operational aspects of engineering assets by utilizing established procedures, relevant experience, and suitable knowledge applicable to regular scenarios.

### What we offer you

Competitive Salary

Hybrid Working

The opportunity to work for an organization that has a strong sense of purpose, is values driven and helps colleagues to develop professionally and personally through our range of people development programmes.

### The role

Conduct relevant activities and offer advice for service delivery within the area of expertise, while adhering to budget constraints and contractual requirements.

Produce deliverables within agreed parameters, meeting specified deadlines, budgetary limits, and quality standards.

Discuss and present deliverables to internal and external clients, suggesting solutions when appropriate.

Carry out activities in accordance with internal procedures, accreditation schemes, legislation,

and industry standards.

Pursue Continuous Professional Development to maintain a high level of discipline, knowledge, and awareness.

Assess or recommend the time and value of work for external clients, assisting in determining appropriate fee and cost structures.

Provide guidance to other employees as needed and facilitate effective knowledge transfer and application of information.

Assist in improving service delivery by communicating internal and external client feedback as relevant.

Ensure appropriate authorizations are obtained and kept up to date for relevant tasks and responsibilities.

Perform routine administration tasks as required, following established processes and procedures.

### **What you bring**

The ideal candidate should possess a degree or equivalent from a recognized tertiary institution in the relevant field of engineering or physical science (minimum of two years program) recognized by Lloyd's Register.

Alternatively, qualifications from a marine or nautical institution along with relevant sea-going experience as a certificated ship's officer.

Membership in an appropriate professional institution.

Working towards or having achieved chartered or incorporated engineering status.

Commitment to working in accordance with professional codes of conduct and the LR Code of Ethics as outlined in IMS01.

Ability to utilize a combination of general and specialized engineering knowledge and understanding to apply both existing and emerging technologies.

Proficiency in applying suitable theoretical and practical methods for the design,

development, manufacturing, construction, commissioning, operation, and maintenance of engineering products, processes, systems, and services.

Capability to provide technical and commercial management, such as project management and process management.

Proficiency in the English language at a level commensurate with the work requirements.

### **About us**

We are a leading international technical professional service provider and a leader in classification, compliance, and consultancy services to the marine and offshore industry, a trusted advisor to our customers helping to design, construct and operate their assets to the highest levels of safety and performance. We are shaping the industry's future through the development of novel and innovative technology for the next generation of assets, while continuing to deliver solutions for our customers every day.
